

# Look for the ATCC® symbol of quality

Quality control laboratories realize the importance of effective microbiological testing. Safety, reputation and business performance depend on it. Organizations look to ATCC brands for top-quality microbial strains that generate the valid, accurate results needed to maintain outstanding QC microbiology programs.

The **ATCC Licensed Derivative® Program** was established in 2005 to positively impact public health, welfare and safety by providing standardized biological materials in line with a program that addresses the need for security and traceability in the QC sector.

Products displaying the **ATCC Licensed Derivative®** emblem

- Are traceable to **ATCC Genuine Cultures®**
- Provide assurance of the quality of the ATCC ingredient contained in the product
- Are endorsed by ATCC as a licensed derivative product

**MicroBiLogics®**

Only a select group of commercial manufacturers can claim their microbial strains are traceable to **ATCC Genuine Cultures®**. These manufacturers have agreed to maintain the integrity of the ATCC ingredient contained in their product and only these companies are licensed to display the **ATCC Licensed Derivative®** emblem.

## Don't take chances on the quality of your cultures.

Look for the ATCC Licensed Derivative® emblem for products derived from ATCC® microbial strains from this supplier.
